

BAFFLES

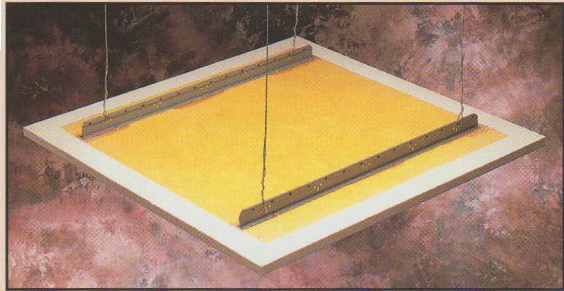

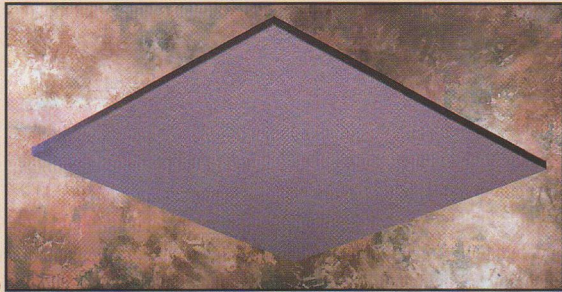

Baffles can be suspended from the ceiling to further reduce reflective sound. Colors and fabrics are the same as those for wall panels. Custom sizes available.

Thicknesses: 1", 2"
Maximum sizes 120" x 24"h x 2"
Absorption Ratings: 1" x 48" x 12' - 6.4 sabins.

CEILING CLOUDS

Ceiling Clouds are suspended horizontally with a special T bar attachment component mounted to the cloud at the time of shipment. Clouds are a highly effective treatment for the reduction of sound reflection. Face and edges of the glass fiber core are wrapped in fabric or to match or accentuate the room design. Custom sizes available.

Baffle and Cloud support:
Can be hung by cable or 12 ga. ceiling wire.
Attaching to the structure above is to be determined by the installer.
Both support and hangars are not provided.

Thicknesses and NRC Ratings: 1" (.80 - .85), 2' (1.00-1.05).

Baffle and Cloud attachment points:
Contact Quiet solutions about attachment methods.
