

ACOUSTICAL CEILING

Quiet Solutions™ offers custom, high performance ceiling panels in a variety of materials and finishes that can accent or complement the walls and floors for a rich looking environment.

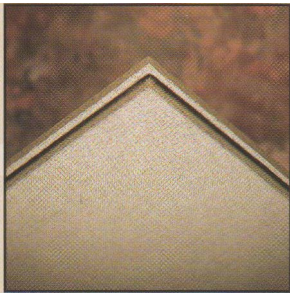

Core Material Options

Glass fiber core with optional foil back. This panel offers high NRC ratings and comes in a variety of finishes.

Perforated mineral board is laminated to glass fiber, which offers improved overall acoustical values. This panel also comes in a variety of finishes

Perforated mineral board offers favorable NRC values and substantially increased STC values. Available in a variety of finishes

Thicknesses and NRC Ratings:

Fiberglass core 10PCF 1/2" (.55-.60)

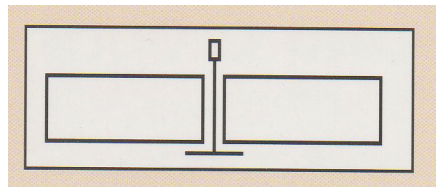

Fiberglass core 6PCF 1" (.80-.85)

Fiberglass core 6PCF 2" (1.00-1.05)

Mineral Board core- 1/2" STC (26 - 28)

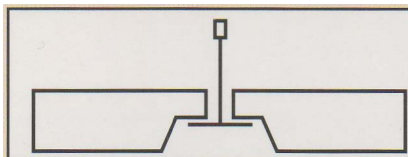

Edge Treatments

Quiet Solutions™ offers a variety of edge treatments for ceilings.

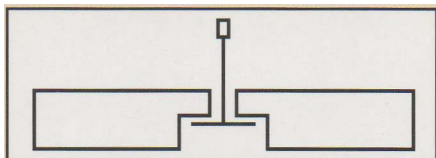

Square Edge

This treatment is the most cost effective installation. Ceiling panels lay flat onto the suspension system.

Angled Reveal

Panel edges are revealed at a slight angle and are suspended from either 9/16" or 15/16" T-bar grid suspension system. Use the angled reveal to match the profile of adjacent ceiling tiles with reveal edges or to add uniqueness to your suspended ceiling.

Standard Reveal

Panel edges are revealed to create a more dramatic look. Use with either 9/16" or 15/16" T-bar grid suspension system. Also for use with 9/16" "slotted" grid suspension system
